Subject: Hangman Creek Draft TMDL

Elaine and Dave please find the following statement concerning the Draft Hangman Creek TMDL for Fecal Coliform, Temperature, and Turbidity.

The Coeur d'Alene Tribe Water Resource Program concurs with the base assumptions used to create the Hangman Creek Fecal Coliform, Temperature, and Turbidity TMDL. This concurrence is based on and limited to the various assumptions put into the WARMF model used to develop this TMDL and does not constitute agreement nor acceptance by the Tribe of the determination of historic flows within the Hangman Creek Watershed.

Let me know if you have questions.

Thanks

Scott Fields
